

89NAH-1003

Handheld Nitrogen Inflator

The NAH has been specially designed for measuring the percentage of Nitrogen (N²) in tyres, ideal for demonstrating to customers that their tyres have been filled with the correct nitrogen amount.

Made of polycarbonate and santoprene, the NAH is high-impact and weather resistant. Fitted with 150 mm-length dual foot air chuck, as an alternative to the standard air chuck, making the process faster and easier.

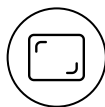

Features

User Friendly

Lightweight, safe, portable and easy to use.

LCD Display

Digital LCD display for easy visibility and convenience

Nitrogen Compatible

Accurately measure percentage of nitrogen.

Accurate Results

Easy calibration and 9V battery included

Specifications

Construction	High impact polycarbonate / santoprene
Degree of protection	IP40
Power	VDC Alkaline Battery
Range	0-100 % nitrogen
Accuracy	± 0.1 vol %
Measurement	Nitrogen Percentage

Technical Data

Handheld Nitrogen Inflator

Included Parts

91.0210

Air Chuck Dual Foot Hold On Brass Rubber 150mm

46.0005

Battery 9V DC Alkaline

44.1021

Sensor Oxygen Class R-22A
