

9 Dec 2025

Dear Valued Customer,

For over 25 years, **Airtec Corporation Pty Ltd** has been a preeminent distributor of digital tyre inflation and onboard mass systems within the Australasian region. Following the introduction of the OBM On-Board Mass functional and technical specification by Transport Certification Australia in 2011 for regulatory compliance, Airtec committed to leading the market in smart on-board sensors for these applications with our approved AXL and AXM range of on-board systems.

In 2020, our team commenced a comprehensive product re-design, culminating in the introduction of our SmartOBM product range. This new range is manufactured within Australia and incorporates the latest in sensing technology and innovation.

With a new manufacturing facility established in Queensland, our SmartOBM product range is now manufactured locally under a new corporate entity, **Airtec SmartOBM Pty Ltd** (ABN 86 115 521 072).

Historically, all products have been purchased and sold through Airtec Corporation Pty Ltd (ABN 14 122 444 277). However, coinciding with the discontinuation of the original AXM/AXL series and the transition to the new AXS series product range, we will be transitioning all new OBM product sales to Airtec SmartOBM Pty Ltd. Consequently, any invoices issued by Airtec SmartOBM will necessitate payment to a distinct bank account, details of which are provided below. Payments for all other products should continue to be directed to Airtec Corporation as per current arrangements.

Customers holding an existing account with previously agreed trading terms with Airtec Corporation must complete new Account Applications with our accounts department at accounts@smartobm.com

Purchase Orders for SmartOBM products will be accepted via sales@smartobm.com, and sales, service, and support inquiries can be directed to **1300 818 884**.

Please find the corporate details for both entities on the following page. We respectfully request that you update your records accordingly.
